## **DETAILED ACTION**

This action is in response to applicant's amendment received on 10/27/03.

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Alcok et al. in view of Hasler et al.

Alcok discloses (Fig. 1-9) the invention including means for advancing the rod stock (23 and 32), a first axis (Fig. 1), a closed knife (51-52) having an edge and a gage surface 115. Alcok doesn't show an air supply having a discharge port. However, Hasler teaches the use of an air supply having a discharge port 13 for the purpose of removing the workpiece out of the cutting machine. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified Alcok's device by providing the air supply having a discharge port as taught by Hasler in order to obtain a device for quickly removing the workpiece out of the cutting machine.

### ***Allowable Subject Matter***

3. Claims 7-8 and 13-16 are allowed.

***Response to Arguments***

4. Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.
